

NOTICE OF A PROPOSAL

By Recurrent Energy

to Engage in Two Renewable Energy Projects

AND NOTICE OF PUBLIC MEETING

Project Name: RE Midhurst 3

Project Applicant: RE Midhurst 3 ULC

Project Location: The Project is located on Line 5 North in Oro-Medonte, northeast of Barrie.

Dated at the Township of Oro-Medonte this the 25th of June, 2010

Project Name: RE Midhurst 4

Project Applicant: RE Midhurst 4 ULC

Project Location: The Project is located north of Highway 11, east of Line 5 North and west of Line 6 North in Oro-Medonte, northeast of Barrie.

Dated at the Township of Oro-Medonte this the 25th of June, 2010

Recurrent Energy is planning to engage in two renewable energy projects in respect of which the issuance of a renewable energy approval is required. The proposal to engage in these projects and the projects themselves are subject to the provisions of the Environmental Protection Act (Act) Part V.O.1 and Ontario Regulation 359/09 (Regulation). This notice must be distributed in accordance with section 15 of the Regulation prior to applications being submitted and assessed for completeness by the Ministry of Environment.

This Public Meeting is being held to provide information on the proposed projects.

Meeting Location:

Date: Wednesday, July 28, 2010

Time: 6:00 pm to 9:00 pm

Place: Hawkestone Community Hall, 3 Allen Street, Hawkestone, ON

Project Description:

Pursuant to the Act and Regulation, the facilities, in respect of which these projects are to be engaged in, are Class 3 Solar Facilities. If approved, these facilities would have a total maximum name plate capacity of 3.5 MW (RE Midhurst 3) and 6.5 MW (RE Midhurst 4). The project locations are shown in the map below.

The Draft Project Description Reports titled *Project Description Report RE Midhurst 3 Solar Project* and *Project Description Report RE Midhurst 4 Solar Project* describe the projects as solar electric generating facilities that will utilize photovoltaic (PV) panels installed on fixed racking structures. DC electricity generated from the PV panels is converted to AC electricity by an inverter. The voltage level of the AC electricity produced by the inverter is stepped-up to distribution level voltages by a series of transformers.

Written copies of the Draft Project Description Reports are being made available for public inspection at www.ontariosolarfuture.ca, and at local municipal offices.

Project Contacts and Information:
