

# NOTICE OF A PROPOSAL

## By Recurrent Energy to Engage in Two Renewable Energy Projects

# AND NOTICE OF PUBLIC MEETING

**Project Name:** RE Waubaushene 4

**Project Applicant:** RE Waubaushene 4 ULC

**Project Location:** The Project is located on Quarry Road in Coldwater, northwest of Orillia.

**Dated at the Township of Severn this the 2nd of June, 2010**

**Project Name:** RE Waubaushene 5

**Project Applicant:** RE Waubaushene 5 ULC

**Project Location:** The Project is located on Taylor Line in Coldwater, northwest of Orillia.

**Dated at the Township of Severn this the 2nd of June, 2010**

Recurrent Energy is planning to engage in two renewable energy projects in respect of which the issuance of a renewable energy approval is required. The proposal to engage in these projects and the projects themselves are subject to the provisions of the *Environmental Protection Act (ACT)* Part V.O.1 and Ontario Regulation 359/09 (Regulation). This notice must be distributed in accordance with section 15 of the Regulation prior to an application being submitted and assessed for completeness by the Ministry of Environment.

### Meeting Location:

**Date:** Wednesday, July 7, 2010

**Time:** 6:00 pm to 9:00 pm

**Place:** Coldwater Community Centre  
11 Michael Anne Drive, Coldwater, ON

### Project Description:

Pursuant to the Act and Regulation, the facilities, in respect of which these projects are to be engaged in, are Class 3 Solar Facilities. If approved, these facilities would each have a total maximum name plate capacity of 8 MW (Waubaushene 4) and 3.5 MW (Waubaushene 5). The project locations are described in the maps to the right.

The Draft Project Description Reports titled *Project Description Report RE Waubaushene 4 Solar Project* and *Project Description Report RE Waubaushene 5 Solar Project* described the projects as solar electric generating facilities that will utilize photovoltaic (PV) panels installed on fixed racking structures. DC electricity generated from the PV panels is converted to AC electricity by an inverter. The voltage level of the AC electricity produced by the inverter is stepped-up to distribution level voltages by a series of transformers. Written copies of the Draft Project Description Reports are being made available for public inspection on at [www.ontariosolarfuture.ca](http://www.ontariosolarfuture.ca), and at local municipal offices.

### Project Contacts and Information:

To learn more about the project proposals, public meetings, or to communicate concerns please contact:
